WORK HISTORY

BART SOLUTIONS

ASP .Net Developer | Lviv | September 2022 - present

I participated in the development of a skincare solution that automatically detects skin problems and suggests solutions, including options to buy medications. This system is equipped with comprehensive administrative features and scraping technology to keep the information about currently available treatments and drugs.

Responsibilities:

- Integration of product barcode scraper using BarcodeLookup API
- Development of a custom background job system
- Integration of a payment system for the client application using Stripe
- Creation of an adaptive and user-friendly interface for the client-side application
- Optimization of SQL query performance
- Integration of reCAPTCHA v3
- Integrating new services using GraphQL

SOFTSERVE ACADEMY

.Net Developer | Lviv(remote) | July 2022 - August 2022

Completed C# Marathon where I gained extensive knowledge on C# and .Net Framework. Improved my collaboration and communication skills

AURA CREATIVE LTD

.Net Developer | Henley on Thames | July 2020 - August 2020

Developing a web application for the designer agency with the ability to view past projects of the agency, read articles about the company goals and team members, subscribe to a newsletter and book a consultation.

Responsibilities:

- Supporting an existing code base
- UI/UX improvements
- Implementing a contact form
- Bug fixing
- Unit, e2e tests
